Timothy J. Rupert : Advances in Accounting Education: Teaching and Curriculum Innovations: 16 before purchasing it in order to gage whether or not it would be worth my time, and all praised Advances in Accounting Education: Teaching and Curriculum Innovations: 16:

Advances in Accounting Education: Teaching and Curriculum Innovations publishes both non-empirical and empirical

articles dealing with accounting pedagogy. All articles explain how teaching methods or curricula/programs can be improved. Non-empirical papers are academically rigorous, and specifically discuss the institutional context of a course or program, as well as any relevant tradeoffs or policy issues. Empirical reports exhibit sound research design and execution, and develop a thorough motivation and literature review, including references from outside the accounting field, where appropriate. Volume 16 examines the following topics: intelligent online tutoring, creating a cheat-proof testing and learning environment, information literacy in the accounting curriculum and cost accumulation in small businesses.

Volume 16 in the series by the same name, this book contains 7 empirical and non-empirical research papers that all consider different aspects of accounting pedagogy. Each paper is held to a high standard; the empirical papers all use careful research design and consider the relevant literature and the non-empirical studies discuss the policy issues and tradeoffs of specific programs in an institutional context. Topics covered include intelligent online tutoring, cheat-proof testing, information literacy in accounting curriculum and cost accumulation in small businesses. --Annotation copy;2015 Ringgold Inc.
