From Springer : **Asset Management in the Social Rented Sector: Policy and Practice in Europe and Australia** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Asset Management in the Social Rented Sector: Policy and Practice in Europe and Australia:

This book fills an important gap in housing research, covering the impact of recent changes in housing policies and

markets on the development of state-of-the-art asset management within the social rented sector in various countries.

From the reviews: "This book provides, to my knowledge, the first large-scale, detailed comparative examination of the housing management strategies employed by social landlords in a relatively large number of European countries together with Australia. . . . fills a key gap in the literature. . . . the chapters are easy to follow and all aspects of asset management are examined in each national case study. This format means that the book will be very useful reference both for those engaged in teaching and those researching comparative housing issues." (Michelle Norris, *European Journal of Housing Policy*, Vol. 5 (3), December, 2005)
