**From Routledge :** **Auditing, Trust and Governance: Developing Regulation in Europe** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Auditing, Trust and Governance: Developing Regulation in Europe:

The reputation of corporate reporting has been in crisis. Trust in the process of financial accounting and auditing has been undermined by a series of high profile scandals involving major corporations, including Enron, Parmalat, Ahold, and Worldcom. In response, regulators and practitioners world-wide have put forward a series of initiatives to repair the damage and restore faith in corporate governance. In this important book, the European Auditing Research Network analyzes how that response has developed in Europe, with particular emphasis on the field of auditing. Leading international academics review how regulation has been revised in specific European countries to help restore

confidence in the contribution of auditing to corporate governance. Various themes are explored, including the growing trend of internationalization in regulation, ethics and auditing, professional liability, and professional education. Auditing, Trust and Governance is an invaluable volume for students, researchers and professionals working in the fields of auditing, accountancy and corporate governance, and provides a useful basis for further research on the effects of the increased regulation.

**About the Author** The volume has been guided and managed as a project through the European Auditing Research Network (EARNet) Scientific Committee, supervised by Reiner Quick, Stuart Turley and Marleen Willekens. Reiner Quick is Professor of Accounting and Auditing at Darmstadt University of Technology, Germany. Stuart Turley is KPMG Professor of Accounting at Manchester Business School, UK. Marleen Willekens is Professor of Auditing at Tilburg University, the Netherlands.
