G. W. A Dummer : Banking Automation: Data Processing Systems and Associated Equipment (Pergamon electronics data series) before purchasing it in order to gage whether or not it would be worth my time, and all praised Banking Automation: Data Processing Systems and Associated Equipment (Pergamon electronics data series):

The two volumes of BANKING AUTOMATION 1970-71 present - for the first time - comprehensive guidance on the vast range of methods and equipment which sophisticated electronic and systems engineering is contributing to the enhancement of efficiency and security in Banks, Finance Houses, Commercial and Industrial concerns throughout the world. Volume I encompasses the field of data processing, and includes a considerable review of existing and potential

applications for computers and associated systems, peripheral and verifying equipment in the continually expanding realm of banking and accountancy. Volume II covers money and cheque handling equipment; communications systems; drive-in banking; safes and security equipment; closed-circuit television monitoring; intruder alarm systems; office and mailing machinery; paper and forms handling equipment; etc. , etc. Useful features include a Directory of suppliers who specialise in the types of equipment, system-planning and services featured in these volumes; also a Glossary which is aimed to be of equal importance to readers with a bias of expertise in banking and money technology, or in automation. These features appear in Volume I.
