From Routledge : The Global Economic Crisis and the Developing World: Implications and Prospects for Recovery and Growth (Routledge Studies in Development Economics) before purchasing it in order to gage whether or not it would be worth my time, and all praised The Global Economic Crisis and the Developing World:

Implications and Prospects for Recovery and Growth (Routledge Studies in Development Economics):

The world economy is currently in the throes of a global economic crisis reminiscent of the great depressions of the 1930s and the 1870s. As back then, the crisis has exposed the major structural imbalances in financial and credit markets in addition to global trade forcing many governments, developed and developing, to impose debilitating austerity measures that are exacerbating the structural weaknesses that caused the crisis in the first place. This volume offers historical insights into the origins of the contemporary crisis as well as detailed analyses of the financial and trade dimensions, an assessment of the technological and innovation context along with perspectives on the implications for unemployment and gender imbalances.

About the Author Ashwini Deshpande is Professor of Economics at the Delhi School of Economics, University of Delhi, India. Keith Nurse is Director of the Shridath Ramphal Centre for International Trade Law, Policy and Services at the Cave Hill Campus (Barbados) of the University of the West Indies.
