It was like having my own trainer, mentor, analyst, advisor helping me dig into my inner being and understand why I succeed or fail.I dicovered that I fail

when I am not true to myself and succeed when all feels right within. It encouraged me to explore further and trust my own good instincts. I started to smile with joy comfort in that values we hold true to ourselves is meaningful, significant worth trusting and building on. "The wise man knows at the beginning what the fool learns at the end". Reading this book, makes you feel you are on the right path. It enriches your wisdom. Having read Dr. Tabrizi's other books, I found this book equally fascinating in its effect. It gives you the clarity of vision, the courage to be brave and bold to dig deep inside with honesty to achieve happiness and success and be a true leader and influence others in a positive manner. 0 of 0 people found the following review helpful. Worth reading if you are not sure "whether you're climbing the wrong mountain" By Lei Wang I echo a lot times while reading it, it's so true that the life is an "endless process of self-discovery", and "you never know what happens next". Quite often, "You wonder whether you climbed the wrong mountain". It's interesting to read authors' stories, sometimes also reminds me of mine. I like the way that this Book attempts to address issues systematically. Quite a few questionnaires and small exercises. well, it would be even nicer if readers can meet up and do this together =) Anyways, it's a nice reading experience! 0 of 0 people found the following review helpful. Thought-provoking read By K. Andersson I'm still in the midst of reading this book as it's one that you read and work through. The whole framework of the book is centered on Know-Be-Lead and through self discovery we can all become better leaders. The book also has an app that acts as a workbook as one reads through it. KNOW: Who am I? Be: Who am I actually being? Lead: Am I authentically leading? Readers create a mission statement as many companies do, which then acts as the central purpose for one's life. Thoroughly enjoying this read, I've listened to a webcast that Tabrizi did regarding "The Inside-Out Effect" and I highly recommend it!

An International Bestseller, The Inside-Out Effect reveals powerful lessons on leadership and achieving your full potential as taught at Stanford University's Graduate and Executive Education Program. It draws upon cutting-edge neuroscience and research from psychology, sociology, and philosophy to create a comprehensive guide for leaders at any level to reinvigorate their lives and the lives of those they affect by pursuing inner-outer alignment. The Inside-Out Effect is based on a three-part process called KNOW-BE-LEAD. Through this method, the authors offer a series of powerful tools that take you to the brink of experiencing your work and life as a calling. They take you into the heart of greater fulfillment, performance, and leadership. Whereas many leadership development books focus on a series of "quick fix" techniques, this book begins and ends with understanding and cultivating yourself. When you begin to live and lead in alignment with your authentic self, you embark on an incredible journey toward peak performance and peak happiness.

"Behnam Tabrizi's The Inside-Out Effect is a breath of fresh air. His portrayal of the leader of the 21st Century is right-on-the-money. Great leaders will prove to be the most precious commodity on Planet Earth in the coming decades. Would-be leaders should read Behnam's book carefully and incorporate his ideas and ideals in everything they do. The Inside Out Effect is a rallying point for our global leaders for the coming century. This is the right stuff." — Dan Walker, Chief Talent Officer, JCPenney and Former Chief Talent Officer, Apple, Inc. Behnam's work helps you lead by helping you know yourself, what you're about, so that you can lead an effective and balanced life. Being your own leader enables you to lead others. That's key to leadership in a world that's changing all the time. Behnam offers real, effective advice, which can really help you out." — Craig Newmark, Founder of Craigslist "We have all seen it in sports teams; I have witnessed it first hand with teams that land robots on Mars. Exceptional leaders succeed with the same team that had underachieved previously under different leadership. The Inside-Out Effect guides you to probe deeply within to discover the authentic leader inside you. It is a refreshing holistic approach to developing leadership. This is a book that is meant to be interacted with and not merely read — more like a workbook. I highly recommend it." — Dr. Firouz Naderi, Director, Solar System Exploration and Former Mars Program Manager NASA's Jet Propulsion Laboratory (JPL) "Taking Professor Tabrizi's class was one the most transformative experiences I had at Stanford University because I realized that leadership is not about emulating other leaders, but looking inside myself and living a life of commitments that truly fulfill me. For you can not take full advantage of yourself unless you know who you are, by understanding what principles shape you, and most importantly what drives you every day." — David de Castro, First-Round 2012 NFL Draft Pick, Pittsburgh Steelers "The Inside-Out Effect is like a sports coach for assisting you in reaching beyond your wildest aspiration. Use the tools in this book, as I have, to transform your life!" — Christopher Sullivan, FOX Sports Commentator and Former National U.S. Soccer Player
