Charles F. Haanel : The Master Key System before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Master Key System:

The Master Key System by Charles F. Haanel was originally published in 1912, over a century ago. One would think that the material in it has been superseded by more contemporary stuff, but to conclude such would be an error of magnitude. The Master Key System is a brilliant presentation about life, the power of positive and creative thinking, and moreover, and possibly most importantly, that with training and discipline, ANYONE can control their circumstances and make their dreams come true. We've all heard about the law of attraction, or how like-attracts-like, or that positive thinking can get us to our dreams - and

there are dozens, maybe hundreds of motivational speakers and disciplines which have popped up on the world's radar in the last few decades alone, all of which pitch the very same philosophical and spiritual truths which Haanel detailed in his book over 100 years ago. The book is written like an instructional manual, in 24 parts, with lessons to be done in order to gain practical skills with the material. This is a book which could easily be lost to us if not put in the spotlight where it belongs along with other classics, because it is at the very bedrock of many of the most modern and contemporary movements, and even possibly, religious practices which are in vogue today. Some might contend that Haanel was not the only one in the New Thought Movement of his time who propagated these concepts, and that may well be true, but one cannot deny the truth of what he has so carefully elucidated in this terribly simple rendering of a philosophical and spiritual classic. I end this review with this quotation from his book: "All thought is a form of energy, a rate of vibration, but a thought of the Truth is the highest rate of vibration known and consequently destroys every form of error in exactly the same way that light destroys darkness; no form of error can exist when the "Truth" appears, so that your entire mental work consists in coming into an understanding of the Truth. This will enable you to overcome every form of lack, limitation or disease of any kind." 5 of 5 people found the following review helpful. The Only Self help book you'll ever need By Joe Jr I have been reading Metaphysical authors since the mid-nineties and Haanel takes the 'ethereal' cake. This book takes some time to read. I am only about two weeks into the book (the process takes twenty four weeks). Initially, I was taken aback because the process was so long but, understood the reason for the method. It takes many years to get to the place where we're at when we first pick up the book. It takes a minimum of 40 days to shift one's consciousness and 120 days to cement the new vibration in the human experience so, 24 weeks should do it. I would wholeheartedly recommend this book to anyone looking to "cement" a permanent change into their life. I like to call the Master Key - the original self help book. The only reason that the Secret (by Rhonda Byrne) was so popular is because The Master Key was published in 1917-falling out of wide circulation. The Master Key is rumored to be behind the success of folks like Bill Gates and others. I would recommend reading Wallace Wattles " The Science of Getting Rich" as well as it reflects some of principles of the Master Key System. The primary difference between the two writings is that you'll spend far more time -solidifying the principles in the latter. Please buy this book! You will not be disappointed. 8 of 9 people found the following review helpful. Truth of all in existence By Vinko It's hard to grasp that something so profound concise and intelligent can be written by one man that is just the same man like you and "i", but after finishing reading and training those principles you will see and know the truth that you are nothing less than omniscient, omnipresent and ever powerful being, through attention and concentration of thought all can be achieved! You will learn that you need to keep your mind clean, strong and filled with positive thoughts of harmony, abundance, courage and health! You will find that mind and matter are same thing just different extreme of the same, and that you are the moulder and the creator of all conditions in life! For me this is by far the best version of the book available on the store in kindle version!
