John Pugliano : The Robots are Coming: A Human's Survival Guide to Profiting in the Age of Automation before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Robots are Coming: A Human's Survival Guide to Profiting in the Age of Automation:

5 of 5 people found the following review helpful. Really enlightening read By Xan. Belzley I was a little skeptical that this would be a fairly alarmist, tinfoil book when I first opened it, but I couldn't have been more wrong! The author begins building their argument by highlighting the very real decline of the need for humans to do certain careers and

emphasizes that the old ways of assuring success-- get an MBA, a law degree, rise through the ranks of one company and retire at 65 with a pension-- don't cut it anymore. However, for every piece of bad news, there are at least two excellent bits of advice for carving out a career path that embraces technology and includes opportunities to learn from and create alongside robots. I think it's an excellent idea to start preparing early for what will be the biggest change in the workforce since the advent of the computer. This book is especially important for parents, who uniquely possess the ability to shape their children's future in a way that ensures their success in an automated world. 2 of 2 people found the following review helpful. Stay Ahead of The Curve By Wendy Valderman The industrial revolution changed the course of history as we know it, we are on the brink of another such revolution and this book by John Pugliano is your way of being one step ahead of it. The book comprises of various tips, tricks and just general information regarding this inevitable new development in the world. Technology is already so ingrained in our daily lives that the majority of Americans would not be able to function without it, however it's still hard to keep up with all of these new developments and trends as technology is something that is constantly shifting and changing. There is no need to follow the crowd or feel left behind this book will guide you to making smart choices be they in your career, business or daily life that will turn you into the trendsetter and put you ahead of the curve. If you have a futuristic mindset and are ready to put that into action this is likely going to be a good read for you. 2 of 2 people found the following review helpful. Automation is going to take over our routine tasks and do a better job. The most important sentence in this book ...By Ann What a fascinating book! I was afraid of what the author was saying in the beginning regarding robots taking over. As I read through each chapter, I wanted to be a 20 something aged person. Our future is going to be so exciting! This book helped me understand the way life is changing. Automation is going to take over our routine tasks and do a better job. The most important sentence in this book to me was "Humans will only become irrelevant when they cease to be human". A robot can not reason. We have gone from horses to cars, wall phones to cell phones, taking a taxi to Uber, and buying goods over the internet and being delivered by a drone. Every one needs to have this book as a reference and go back and reread it! This would be a perfect High School graduation gift.

HOW YOU CAN SURVIVE (AND EVEN THRIVE) DURING THE ARTIFICIAL INTELLIGENCE-POWERED ROBOT TAKEOVER OF THE WORKPLACE Robots are coming for your job. Regardless of your profession, degree or experience, there is no escaping the automated future. However, you can take steps today that will guarantee you not only survive, but thrive in this new economy. *The Robots Are Coming* provides the first actionable guide to plan for and actually profit from these disruptive innovations. It offers an easy-to-understand overview of automation trends and explains what you need to know today to secure your future success, including how to:

- Understand potential job threats
- Develop irreplaceable skills
- Foster creative advantages
- Identify robot-proof careers
- Spot investment opportunities

 Author John Pugliano, host of the popular *Wealthsteading* podcast, shows how to harness the uniquely human qualities that will give you the competitive edge over automation: creativity, ingenuity and entrepreneurship. If you want to defeat the robots, you need to have a battle plan.

About the Author John Pugliano is the host of the popular investment podcast, the *Wealthsteading Podcast*, and is the founder and money manager at *Investable Wealth, LLC*. He has spent over 30 years studying and applying the habits of financially independent middle-class Americans. His circuitous path to success included serving in the military as both enlisted and officer; a corporate career in sales; and finally a late blooming entrepreneur. John has an M.S. in Systems Management from the University of Southern California and a B.S. in Environmental Science Engineering from Penn State. John and his wife Cheryl live in Utah and are the parents of six children.
