From BooklistStraub has more than 25 years' experience teaching business and management and was a frequent contributor to the American Management Association's now defunct monthly, *Getting Results . . . for the Hands-On Manager*. His articles dealt with the practical, day-to-day requirements of being a manager, and that approach is also reflected in this book, which is actually a substantially revised and expanded version of Straub's *Successful New Manager* (1994), which was part of AMACOM's *WorkSmart* series. He begins by advising new managers that they must now develop a new mind-set, and he describes the various roles a manager must assume. He then offers tips on the different tasks a manager performs: time management; goal setting and planning; leadership; team building; decision making; delegating; hiring and orienting new employees; motivation; performance appraisal; discipline, grievance handling, and termination; and communication. Each discussion ends with a self-test that helps emphasize and summarize Straub's key points David Rouse "A clear, simple, intelligent look at the management landscape that should help someone tackling their first management position." -- *The Globe Mail (Canada)* About the Author Joseph T.
