From Routledge : Tourist Clusters, Destinations and Competitiveness: Theoretical issues and empirical evidences (Routledge Advances in Regional Economics, Science and Policy) before purchasing it in order to gage whether or not it would be worth my time, and all praised Tourist Clusters, Destinations and Competitiveness:

Theoretical issues and empirical evidences (Routledge Advances in Regional Economics, Science and Policy):

Tourism has become one of the largest and fastest growing sectors in the world economy. Increasingly, research on tourism destinations has been at the centre of debates concerning destination competitiveness, governance, policies and destination management and marketing. This book investigates tourist destinations from two different perspectives. First, it approaches destinations using the concept of tourist clusters and investigates their role in competitiveness and firm performances. The second perspective studies the development of models of competitiveness and governance. It also develops an international benchmarking system of 15-EU countries, with an additional focus on Italy, UK and United States. The book will appeal to academics, scholars and practitioners in tourism studies, management, urban and regional studies and economic geography, etc.

About the Author Francesco Capone is Assistant Professor at the Department of Economics and Management, University of Florence, Italy.
