Thomas Farole, Jose Guilherme Reis : Trade Competitiveness Diagnostic Toolkit (Trade and Development) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Trade Competitiveness Diagnostic Toolkit (Trade and Development):

This toolkit provides a framework, guidelines, and practical tools for conducting an analysis of a country's trade competitiveness in terms of growth and share performance, diversification, and quality. It aims to facilitate the identification of the main constraints to improved trade competitiveness and the policy responses to overcome these constraints.
